

**RADIOTHERAPY**

**PAPER – IV**

RTH/D/14/41/IV

Time : 3 hours

Max. Marks : 100

**Important instructions:**

- Attempt all questions in order.
- Each question carries 10 marks.
- Read the question carefully and answer to the point neatly and legibly.
- Do not leave any blank pages between two answers.
- Indicate the question number correctly for the answer in the margin space.
- Answer all the parts of a single question together.
- Start the answer to a question on a fresh page or leave adequate space between two answers.
- Draw table/diagrams/flowcharts wherever appropriate.

- |   |       |
|---|-------|
| 1. Discuss the effects of radiation therapy on embryo and foetus. What is the maximum permissible dose to a pregnant female? What is the cut off dose when termination of pregnancy is advised after accidental radiation exposure? | 6+2+2 |
| 2. What is alpha beta ratio in radiation biology? Discuss the concept of biological effective dose.   | 3+7   |
| 3. What is a hypoxic cell sensitizer? Enumerate them. What are the characteristics of an ideal radio sensitizer?  | 3+2+5 |
| 4. What is radiation bystander effect? Describe the various methods of biological dosimetry.  | 2+8   |
| 5. Discuss the motion management techniques used in modern radiotherapy.  | 10    |
| 6. Describe the pathology of radiation induced cataract: How best one can reduce dose to lens in conventional RT planning of carcinoma maxillary antrum.  | 5+5   |
| 7. Describe in detail acute radiation syndromes with reference to nomenclature, dose threshold and clinical effects.  | 3+2+5 |
| 8. Describe adjuvant therapy in carcinoma rectum T <sub>3</sub> N <sub>1</sub> M <sub>0</sub> post abdomino perineal resection.   | 10    |
| 9. Discuss the guidelines for treating a patient, with radiation therapy, who is having a cardiac pacemaker.  | 10    |
| 10. What do you understand by breast cancer gene signature? Discuss the role of mamma print in a patient of breast cancer.  | 2+8   |
